

# STAR

*If your office waste is sitting in the “too hard” basket, STAR can help solve your recycling dilemmas. From confidential records to recalled products, STAR has a responsible solution.*

*Recycling for the right reasons*

With more than 40 years experience in pioneering recycling in Australia, STAR Environmental Services can tailor a recycling program that really works for your organisation.

Combining the very best in secure systems, technology and community partnership, STAR delivers a comprehensive and responsible waste removal service.

## ★ RESPONSIBLE RECYCLING

Every organisation is unique, and so are its recycling needs. Let STAR design an effective recycling programme that leaves you free to look after today’s business demands, not worry about yesterday’s surplus materials.

STAR’s services include: confidential document destruction with secure collection systems, e-waste recycling, magnetic and electronic file destruction, disposal of discontinued or recalled products, and paper, plastic and waste metal recycling.

## ★ MINIMAL LANDFILL

STAR guarantees that everything possible is recycled. For example, after shredding, documents are baled and transported directly to paper mills for recycling into paper products. Reusable metal items such as paper clips and bulldog clips are removed and packaged for reuse. Plastics are recycled.

Electronic waste (e-waste), including obsolete computers and electronic equipment, is dismantled, de-manufactured and sorted into specific waste streams for plastics and various metals for processing and re-use.

Magnetic storage mediums, including CD’s, microfiche, microfilm, X-Rays, and audio and videotapes, can also be securely destroyed in an environmentally responsible process. Confidential documents are processed with a quality assured integrated service from collection at your office through to secure shredding and recycling.

## ★ EMPLOYMENT CREATION

STAR’s partnership with its customers can extend into partnerships with charitable organisations that provide meaningful employment for people with special needs.

Through this programme a wide range of services are able to be tailored to customers recycling needs.

## ★ ABOUT STAR

Star Environmental Services is part of the Watts Waste group of companies, an independent Australian business with over 40 years experience in developing innovative and responsible recycling solutions for its customers.

With representation across Australia, STAR can solve all your organisations recycling dilemmas, combining the benefits of our service with recycling for the right reasons.

To discuss how STAR can improve your recycling, please contact our friendly staff. We’d be delighted to meet with you to tailor a programme just right for your organisation.
